EDUCATION

BS Computer Engineering

August 2023 - June 2027

Information Technology University, Lahore

Intermediate in Computer Science

July 2021 - July 2023

Unique Group of Institutions

SKILLS

Relevant Coursework: Machine Learning, DBMS, DSA, OOP, Embedded Systems

Programming Languages: C, C++, Python, SQL

Web & Backend: Flask, HTML, CSS

Tools & Software: MATLAB, SolidWorks, Blender, GitHub, VSCode, Microsoft SQL

Soft Skills: Event Planning, Media Production, Technical Communication

PROJECTS

YOLOv5-Based Cleanliness Detection System - Machine Learning (Team Project)

May, 2026 - June 2026

- Trained and fine-tuned a YOLOv5 model on an augmented custom and open-source dataset, achieving high-accuracy real-time detection of dirt and contaminants.

Reservify - All-in-One Booking Web App - DBMS (Team Project)

December, 2025 - January 2026

- Designed and normalized a SQL Server database to 3NF, implementing stored procedures, triggers, views, and indexes to ensure data integrity and efficient querying.
- Implemented hashed authentication and role-based access control for customers, providers, and admins, securing a multi-service booking platform spanning hotels, flights, rides, and events.

ITU Connect - University Web Platform (Group Project)

July, 2025 - August 2025

- Built a full-stack university platform using Flask and Python, integrating an academic resource hub, timetable system, and dynamic frontend in HTML, CSS, and JavaScript.
- Developed an NLP-based chatbot using Naive Bayes and TF-IDF, enabling automated responses to common student queries and reducing manual support needs.

Banking System Simulation - Data Structures & Algorithms (Team Project)

November, 2024 - December 2024

- Developed a multi-structure banking backend in C++, using a hash table for account storage/lookup, a binary search tree for employee records, and linked lists for per-account transaction history and the customer token queue.
- Implemented a stack-based rank tracking system for employee promotions/demotions and a FIFO token queue for service requests, enabling structured employee management and orderly customer processing.

CERTIFICATIONS

AI For Everyone

August, 2025

By DeepLearning.ai, Coursera (Credential ID MEPJYKQYB6OQ)

EXTRACURRICULAR

Media and Events Director at IET OnCampus ITU

August, 2025 - June 2026

Led media coverage and event planning for IET OnCampus ITU.

Video Editor at IEEE Student Branch ITU

August, 2025 - June 2026

Produced and edited promotional video content for IEEE Student Branch ITU.

Publicity Member at IEEE WIE SBAG ITU

August, 2025 - June 2026

Assisted in promoting events and increasing outreach for IEEE WIE SBAG ITU
